Variation	Recipients	Open rate	Click-through rate	Revenue	Leading on revenue
Variation A	744	59.6%	2.09%	PLN 767.96	—
Variation B	744	56.5%	1.66%	PLN 819.95	Yes

What each variation changes is not exposed by the Klaviyo API — account manager to add the hypothesis for each test. Small samples: treat as directional until Klaviyo declares a winner.

Split tests — campaigns

All 39 October email campaigns were sent as an even split: control (Variation A) vs. Maverick-optimised variants

Variant type	Variants sent	Recipients	Open rate	Click-through rate	Revenue	Revenue / recipient	Tests won (revenue)
Variation A (control)	39	346,119	23.5%	0.71%	PLN 62,091.93	PLN 0.18	7 of 39
Maverick Optimizer v2	50	431,452	32.1%	1.20%	PLN 147,337.72	PLN 0.34	26 of 39
Maverick Sh90On	25	222,262	29.4%	0.92%	PLN 48,872.42	PLN 0.22	6 of 39

Each campaign send was split evenly across its variations (all recipients received a variant; no winner auto-send), so all tests are complete. Winner = highest attributed revenue per send. Per-send results on the next slides.
